GEORGE L. EHRLE

Nurseryman and Florist

BLOOMFIELD ROAD, Near Allwood Road,

RICHFIELD, N. J.

Paterson R. F. D., No. 2

'Phone Passaic 2648-M-1

INTRODUCTION.

I take this opportunity to thank my customers; also their recommended friends for their past liberal patronage and take pleasure in soliciting their further orders.

After having life-long experience in growing plants, it is my aim to supply the best grade of Nursery Stock. All orders will receive my prompt attention. Give me a trial order and I shall always endeavor to give each customer full money value, whether the order is large or small.

This price list does not cover everything I grow, but only such stock as I have to offer in quantity. I have been adding a number of the choicest plants from European Nurseries, which I will offer as soon as stock is available. Every square foot of my nursery is under irrigation.

LOCATION: My nursery is located on Bloomfield Road, near Allwood Road, midway between Paterson and Bloomfield. Coming from Passaic, Bloomfield Road, (not Bloomfield Avenue) is the first road to the left running parallel with the canal after crossing the Van Houten Avenue Bridge. Bloomfield Road, (not Bloomfield Avenue) is the northern continuation of Broad Street in Bloomfield. The Paterson-Bloomfield Bus passes the Nursery.

SHIPPING FACILITIES: All plants are forwarded by Express or Parcel Post, the purchaser paying charges. I make no deliveries. For Parcel Post Charges, add ten per cent. extra, to all orders East of the Mississippi and twenty per cent. west of the Mississippi.

REMITTANCES: Should be made by Post Office Money Order, Express Money Orders or drafts on New York Banks. Please send sufficient money with order to cover the whole bill. I decline to send plants collect on Delivery, and disclaim all responsibility when remittances are not made as above directed. A convenient method of remitting for small accounts is in one and two cent postage stamps. Money should not be sent by mail.

PACKING: No charge is made for packing when cash accompanies the order.

TERMS: Strictly Cash.

While I may exert the greatest care to have everything true to name I will not assume any responsibility for errors that may occur other than to replace any stock that may prove untrue.

Faithfully yours,

GEORGE L. EHRLE.

PERENNIALS.

I have a choice collection of these hardy plants. The following are some of the best kinds. Those marked ‡ are well adapted for rock garden. Those marked † for cutting.

‡*Achillea* Boule de Neige (Ball of Snow) White, 2 feet, June-Sept.

‡*Millefolium* Roseum (Rosy Milfoil) Pink, 18 in., flower all summer.

**Tomentosa* (Woolley Yarrow) Yellow, 1 ft. June.

‡*Aconitum* Fischerii (Monkshood) Dark Blue, 2 to 3 feet, Sept-Oct.

‡Sparks Variety, Dark Blue, 3 feet, June-July.

All *Aconitum* \$.35 each; \$3.00-10; \$25.00-100.

**Alyssum saxatile compactum* (yellow) 1 foot, May.

Anchusa italica (Dropmore Variety) Blue 4 to 5 feet, May-June.

Pride of Dover, Heavenly Blue, 3 to 5 feet, June-Sept., \$.50 each; \$4.50-10.

Myosotidiflora, Bright blue forget-me-not like flowers, 10 to 12 inches, April-May, \$.50 each; \$4.50-10.

**Anemone Japonica* Queen Charlotte, Pink, 2 to 3 feet, Sept-Oct.

Whirlwind, White, 2 to 3 feet, Sept-Oct.

**Pulsatilla* (Pasque Flower) Violet Purple, White, Dark Red, 9 to 12 inches high, April-May.

Anthemis tinctoria Kelwayi, Yellow, 2 feet, June-Oct.

‡*Aquilegia* (Columbine) Selected, long-spurred—from the choicest strains. They have been admired by everybody who has seen them at my Nursery, 2 to 3 feet, May-June.

Coerulea Blue and White, 2 to 3 feet, May-June.

Rosea. Pink form of the above.

**Arabis Alpina* (Rock Cress) White, 1 foot, April-May.

Hon. Edith Gibbs, lavender, rockery, 18 inches.

Prima Donna, white, rockery, 3 feet.

**Pleiad* Section:

Esther, pale pink, 2 feet, 6 inches.

Lovely, pale mauve, 2 feet, 6 inches.

**Vimineus* Section:

Osprey, delicate blue, 2 feet, 6 inches.

Novae Angliae Section:

Gerald Perry, rose, 6 feet.

Mrs. F. Raynor, crimson, 6 feet.

Rosea, rose, 6 feet.

Mrs. S. T. Wright, rosy purple, 6 feet.

Novi Belgii Section:

Avalanche, good late white, 5 feet, 6 inches.

Beauty of Colwall, lavender blue, semi-double, 4 feet.

Bluebeard, blue, 6 feet.

Blue Gem, a very fine, late, rich blue, 3 feet, \$.50 each.

Climax, finest single blue, 6 feet.

PRICE:—All plants except where noted, \$.25 each; \$2.00-10; \$15.00-100.

Novi Belgii Section:

Coerulea, deep blue, 4 feet.
 Edith Goodwin, very deep blue, 4 feet.
 Feltham Blue, dark blue, 4 feet.
 Lavender Queen, lavender pink, 5 feet.
 Louvain, lovely pink, 3 feet.
 Maggie Perry, mauve, 3 feet.
 Marne, bright pink, 3 feet, 6 inches.
 Perry's White, white, shaded lilac, 4 feet.
 President, blue, 5 feet.
 Rapture, mauve pink, 5 feet.
 Saturn, blue, 5 feet.
 St. Egwyn, good pink, 3 feet, 6 inches.
 The Queen, very pale blue, 6 feet, 6 inches.
 Thelma Perry, pink, 4 feet.
 White Climax, white, 6 feet.
 Well's White, white, 6 feet.

‡Astilbe do not burn and can stand more dry weather than Spiraea.
 Should be planted on moist places. Average height, 2 to 3 feet,
 June-July. Offered the first time in America.

Amethyst, erect, well branched, violet purple spikes.

Bergkristall, late white.

Diamant, flowers loose, clustered white.

Gloria, dark pink, shaded lilac, one of the choicest.

Granat, strong spikes, dark crimson, quite a unique color, not yet
 found in Astilbes.

Hyacinth, lilac rose.

Rubin, deep crimson pink.

All Astilbes, strong flowering crowns, \$.50 each, \$4.50-10.

A collection of one each of the above for \$2.50.

Bocconia cordata? Planted mostly for its robust growth; flowers not
 showy, 6 to 8 feet.

Boltonia (False Chamomile) Asteroides, white 5 to 6 feet, Aug.-Sept.

Latisquama Pink, 5 to 6 feet.

Nana, Compact dwarf variety of the above, 3 feet.

*Campanula carpatica, (Harebell) Blue and white, 6 inches, July-Aug.

*Glomerata, dark blue, 1 foot, June-July.

‡Medium (Canterbury Bells) Blue, white and rose, 2 feet, June.

‡Calycantha (Cup and Saucer Canterbury Bell) Blue, white and
 rose, 2 feet, June-July.

Pyramidalis (Chimney Bellflower). The showiest of all perennial
 campanulas. Blue, white, 4 to 6 feet, July-Aug.

‡Centaurea dealbata, Rose, 1½ feet, July-Aug.

Macrocephala, Yellow, 3 feet, July.

Montana (Perennial Cornflower) Blue, 1½ foot, June-Sept.

Alba, white, 1½ feet, June-Sept.

*Cerastium tomentosum, Bright silvery foliage, small white flowers, 8
 inches, May-June.

‡Chelone Glabra (Turtle head) Likes a damp location, white, 2 to 3 feet,
 Aug.-Sept.

Lyoni, Red, 2 to 3 feet, Aug.-Sept.

‡Chrysanthemum. I have a fine collection of these popular outdoor
 flowers. They should always be planted in a southern, well-
 drained exposure which protects them from early frost. Shelter
 with a covering of loose leaves and litter in December.

Autumn Glow, crimson rose.

Brown Bessie, dark bronzy red, small button variety.

Brune Poitevine, dark velvety red.

PRICE:—All plants except where noted, \$.25 each; \$2.00-10; \$15.00-100.

Capt. Cook, rose pink.
 Chaldon, reddish crimson.
 Connie Dick, Yellow.
 Fairy Queen, light pink.
 Fernridge, reddish bronze, almost single.
 Glory of Seven Oaks, Yellow, very early.
 Golden Queen, yellow.
 L'Argentuillais, red, yellow striped.
 Mary Richardson, single buff and terra-cotta.
 Mr. Rux, yellow and bronze.
 Mrs. Collier, white, small button variety.
 Normandia, pink.
 Old Homestead, pink.
 Pink Doty, finest pink.
 Shaggy Yellow, petals loose.
 Single Pink, large flowering.
 Victory, white.
 White Doty, finest white.
 Waco, white, small button.
 A set consisting of one each of the above 22 varieties, \$3.00;
 \$12.00-100.

‡Old fashioned early, large flowering, very fine when disbudded. These
 need a little more protection during winter.

Chrysolora, yellow.
 Mrs. T. W. McNiece, lilac.
 Oonto, white.
 Sunray, yellow.
 Unaka, pink.
 \$.20 each, \$1.80-10; \$12.00-100.

‡Cimicifuga racemosa (Snakeroot). Loves a shady place, white, 4 to 6
 feet, July-Aug.

Simplex, this variety is very scarce, ready for cutting in autumn
 when good flowers are scarce; 2 to 3 feet, Sept.-Oct., \$.50 each;
 \$.45-10.

‡Coreopsis lanceolata gd. fl. yellow, 2 feet, June.

‡Delphinium. After trying to raise a number of named kinds which are
 always troubled with mildew and the disease called the Blacks,
 I have discarded my entire collection. The finest delphinium in
 the world today are the Watkin Samuel's Wrexham Strain. I
 am offering, this spring, a limited quantity of strong plants at
 \$1.00 each.

‡Delphinium Belladonna improved. This variety came from Germany
 and is a great improvement, having larger flowers; also a bet-
 ter color than Belladonna, \$.50 each; \$.45-10.

‡Chinenses, deep blue, Alba, white, 2 feet.

Dianthus (See Hardy Pinks).

Dicentra spectabilis (Bleeding Heart). Pink, 2 feet, April-June. Should
 be planted in early fall, \$.50 each.

Dicamnum Caucasius (Gas Plant) best variety, flowers double the
 size of the old type, \$.50 each; \$.45-10.

Digitalis Gloxinoides (Foxglove) white, rose, purple, 4 feet, May.

‡Echinops Ritro, blue, 3 to 4 feet, July-Aug.

Eryngium alpinum (Sea Holly) Flowers of this variety are 3 inches
 across, steel blue, 2 feet, July-Aug., \$.50 each, \$.45-10.

Oliverianum, Amethyst blue, fine for cutting, \$.50 each; \$.45-10.

‡Planum, blue, 2 feet, July-Aug.

PRICE:—All plants except where noted, \$.25 each; \$2.00-10; \$15.00-100.

- ‡*Eupatorium coelestinum* (Mist Flower) blue, 2 feet, Aug.-Oct.
- Ageratoides*, white, 4 to 5 feet, Aug.-Sept.
- Purpureum* (Joe Pye Weed) purple, good plant for the wild garden, 6 to 7 feet, Aug.-Sept.
- ‡*Feverfew*, (Little Gem). Not hardy but a useful plant for cutting, flowers, double white.
- ‡*Funkia subcordata* (White Day Lily) 1½ feet. Aug-Sept., \$.35 each; \$3.00-10.
- ‡*Undulata*, *variegata*, blue 2 feet, Aug.-Sept.
- ‡*Gaillardia grandiflora* (Blanket Flower) Red and yellow, 2 feet, June-Oct.
- ‡*Geum atrosanguineum*, Crimson 2 feet, May-July.
- Mrs. J. Bradshaw, Red, 2 feet, May-July.
- ‡*Gysophila paniculata* (Baby's Breath) White, 2 to 3 feet, May-June.
- ‡*Paniculata* fl. pl. A fine double form with larger flowers and of a pure white color. May be cut and dried. Strong Grafted Plants, \$.50 each, \$4.50-10.

 Mme. Caroline Testout, bright satiny rose.
 Mme. Edouard Herriot, coral-red, shaded with yellow at base.
 Mme. Leon Pain, light silvery salmon.
 Mme. Marcel Delanney, pale pink shaded to hydrangea pink.
 Mme. Segond Weber, rosy salmon.
 Mrs. Aaron Ward, deep Indian yellow, occasionally washed with salmon.
 Mrs. A. Ricardo, deep yellow suffused in pink.
 Mrs. Franklin Dennison, white, primrose-yellow shading.
 Mrs. George Marriott, deep cream and pearl, suffused vermillion.
 Ophelia, salmon-pink-flesh.
 Pharisaer, rosy white, shading to silvery salmon.
 Premier, deep rose pink.
 Prince de Bulgarie, silvery flesh.
 Radiance, brilliant carmine pink.
 William F. Dreer, shell pink petals with golden yellow bases.
 William R. Smith, soft silvery white, shading to peach-pink.
 Mme. J. Bouche, white.
 Rose Maria, bright rose-pink.
 PRICE of Roses, \$1.00 each; \$7.50-10.

HARDY CLIMBING ROSES

Bessie Lovett, clear, bright crimson.
 Dorothy Perkins, white.
 Dr. W. Van Fleet, long and pointed deep pink buds.
 Excelsa, brilliant scarlet crimson.
 Paul Noel, salmon pink.
 Pauls Scarlet Climber, clear scarlet.
 Silver Moon, faint yellow.
 Mary Wallace—New Hybrid Wichuriana Rose. This is one of the late Dr. W. Van Fleet's new Roses, who has given us such fine varieties. It is named in honor of the daughter of the late Secretary of Agriculture Wallace. The Department describes this as a strong growing pillar rose, six to eight feet high with large semi-double flowers, rose pink with a salmon base, four inches across. Its foliage is disease-resisting. It is hardy in New England. Strong, field-grown plants, \$1.50 each.

PRICE OF CLIMBING ROSES: \$.85 each; \$7.50-10.

Richfield, The Garden Spot of the State

By WILLIAM WINFIELD SCOTT

That Richfield is a most appropriate name for that portion of Clifton in the neighborhood of the abandoned Morris Canal and the Notch was never more apparent than at the present time, when acre upon acre present garden produce in over-abundance.

There are rows upon rows—long ones, too—of what appear to be every kind of edible vegetables, all in the glory of their growth. Never has mother earth given so bountifully of vegetable wealth. Every night, motor trucks, fairly bulging with their valuable cargoes, go to market; either to Newark, Paterson, New York or Jersey City, returning the next morning entirely empty. The demand for Richfield's vegetables is, at all times, greater than the supply. They are considered superior to all others. The secret lies with the soil, the consistency and strength of which is superior to that of any and all other localities. The appearance of everything—the dwellings, barns and gardens—indicates prosperity, even to the windmills (which are numerous), the trucks and pleasure autos; everyone of which is in spick and span condition. Poverty is unknown here, owing to the industry and frugality of the farmers, members of whose families—women, girls, men and boys—together with hired help may be seen from early dawn to dusk, working in the various fields, assisted by the latest patented implements and machinery, even to motor trucks, instead of wagons, and electrically propelled machinery.

The fact is, and so determined and announced officially by the State Agricultural College, New Brunswick, that Richfield leads the whole world in not only acreage under cultivation, but in the quantity and quality of its produce—something of which we as neighbors have cause to be proud as well as these men who brought the business to that state of perfection that pupils from this college make frequent visits to these garden farms for the purpose of observing the process and technique of growing vegetables successfully. For years, these farmers labored under a disadvantage in not having a railroad over which to ship their produce. To be sure the canal was there, but its motive power was too slow for fresh vegetables. Of late years, however, the motor truck has solved the transportation problem. For over a century this locality has been the garden spot of the county when the Post, Slp. Garrison, Van Wagoner, Everson, Vreeland, Van Houton and other families began raising vegetables for the Newark and New York markets, who in order to induce laborers to settle there erected a small log school house, where now is the bed of the empty canal, along the southwesterly side of Clifton Avenue, which was erected in 1728, and remained on that site for more than a century, or until the canal appropriated the land in 1836. The farmers of Richfield pride themselves as being not only tillers, but owners of the soil which they cultivate so scrupulously.

During the Revolutionary war the farmers of this section suffered great losses from the depredations of the British who robbed them of all their horses and cattle. The pure air of this section makes for long lives. Henry Freise, who has resided here for half a century, is ninety-two years old, with prospects of living many more, judging by his activity and good health. So keen has been the study of these professional market gardeners, that they were able to place their growing vegetables beyond the scourge of rainless days, by constructing a system of water sprinklers over their many acres. This system is composed of iron pipes, standing in rows about fifteen feet apart, raised perhaps four feet above the ground. The pipes, connected with the main of the Consolidated Water Company, are studded with pin holes, six inches apart through which are forced tiny streams of water, with sufficient force as to cover entire gardens, thereby keeping the soil at the right degree of moisture.

This section of Clifton, two centuries ago, was discovered to possess soil adapted to raising vegetables. A glance at the city atlas discloses long and narrow farms, which, today, are, as they were laid out upon a map showing the first division of the land, made about 1700. On this map farms of fourteen, forty and forty-four acres were laid out, by a Dutchman, John Van Kerk, for the fourteen Dutchmen who were the pioneer white settlers of this county, each of whom received one of the fourteen and forty-four acre farms. Of the forty acre farms there were only nine just enough to give one to each of the heads of families. Of these families four brothers composed the Vreelands and two the Van Winkles. Nearly all about ninety per cent. of the original farm lines, exist today, as they were laid out, over 200 years ago.

As to who was the first settler here, is uncertain, but the writer, after years of careful research, is inclined to award that honor to Matthias Everson, who purchased, about 1740 lot No. seven containing forty acres extending from the mountain easterly to the "King's highway," (later Telegraph Road). Shortly thereafter he induced his brother-in-law, Richard Pickerstone, to locate on the adjoining farm where, today one of his direct descendants, Harry Paxton, resides, perhaps ignorant of his relationship to one of the first settlers. This family name, at first, Pickerstone, was changed to Peckstone and later to Paxton, after whom the city of Paterson named a street, which runs through what was once Paxton farm, then in the old township of Acquackanonk, where in the various Paxtons owned much land.

HEDGE PLANTS

BARBERRY—The Barberry I offer is different from that usually offered. It is grown from seeds from the choicest collection in Japan and is more vigorous than domestic Barberry, very effective in mass planting and makes a splendid hedge. In describing the size of Barberry, 18-24 inches does not mean that a plant has only a few branches. They are all strong, bushy plants. Barberry in large sizes is very scarce. I am very fortunate to have a fine stock of these for specimen and mass plantings.

Globe shaped Specimens, 3 feet, \$3.00 each.

	Price 10	100
12 to 18 in. plants, plant 1 foot apart for hedge	\$2.00	\$15.00
18 to 24 in. plants, plant 1½ ft. apart for hedge	3.00	25.00
24 to 30 in. plants, plant 1½ ft. apart for hedge	4.00	35.00
30 to 36 inches—Specimens, \$1.00 to \$2.00 each.		

CALIFORNIA PRIVET—Always plant Privet two or three inches deeper than where they started to branch, and cut back to 1 foot.

18 to 24 in., well branched, plant 6 in. apart for hedge.....	\$ 6.00
24 to 36 in. well branched, plant 1 ft. apart for hedge.....	12.00
24 to 36 in. well branched, extra heavy	15.00

FLOWERING SHRUBS

I offer only a few of the choicest Flowering Shrubs. These are all strong, bushy plants, pruned back last spring. They are stronger than those usually offered and give immediate effect.

Almond, double red and white flowering, strong, \$1.00 each.

Althea, (Rose of Sharon) Double red, white, pink.

Buddleia magnifica (Summer Lilac) Violet mauve, 3 to 4 ft. high.

Cydonia Japonica, (Japanese Quince) red, very early.

Desmodium penduliflorum, purple, pea-shaped flowers in fall.

Deutzia crenata fl. pl., Double white.

Forsythia, (Golden Bell). One of the first to flower, yellow.

Hydrangea arborescens, white.

Paniculata gd. fl., white, very attractive, Standard Tree shaped, \$1.50 each.

Indian Currant, small red fruit.

Lilac, Common purple.

Red and Yellow Twigged Dogwood, for winter bark effect.

Philadelphus, (Mock Orange), white, fragrant.

Snowberry, produces white fruit in fall.

Spiraea A. Waterer, crimson, flowers all summer.

prunifolia (Bridal Wreath) an old favorite shrub with double white flowers.

opulifolia aurea, tall growing shrub with golden tinted foliage.

Van Houttei, the best white spirea.

Tamarix (Tamarisk) a slender, tall-growing shrub with feathery foliage and delicate pink flowers.

Weigela Rosea, pink fragrant.

Eva Rathke, carmine, flowers all summer.

PRICE: Strong three year old plants, \$.50 each, \$4.50-10, except where noted.

ORNAMENTAL TREES

Catalpa Bungei (Umbrella Tree). These make handsome standard trees, very dense, symmetrical heads, 6 to 7 feet, \$2.50 each.

Morus, (Weeping Mulberry) an umbrella-shaped head with long weeping branches, \$2.50 each.

FRUIT TREES

Peach Trees in the best varieties, strong 5 to 6 feet, J. H. Hale, Belle of Georgia, Elberta, Carman, Crawford's Late, \$.75 each.
Kieffer Pear, 5 to 6 feet, \$.75 each.

CLIMBING VINES

Ampelopsis quinquefolia (Virginia Creeper), \$.35 each.
Veitchii, Boston Ivy for covering walls, etc., \$.35 each.
Clematis paniculata, Japanese white flowering clematis, 3 yr., \$.35 each; 5 years, \$.50 each.
Honeysuckle (Woodbine) white and yellow flowers, \$.35 each.
Polygonum Auberti, (Silver Lace Vine) strong growing vine producing, through the summer, sprays of white flowers, \$1.00 each.
Wisteria chinensis, blue, \$1.00 each.

GRAPEVINES

Concord, black, strong, 4 year, \$.50 each; \$4.50-10.

ROOTS AND HERBS

Asparagus roots: Argenteuil, Barr's Mammoth, Conover's Colossal, Palmetto, 3 year old, \$2.00-100.
Pedigreed Washington Asparagus, new rust resisting variety, 3 years old, \$3.50 a hundred.
Chives, Clump, \$.15 each; \$1.25-10.
Lavender, \$.25 each; \$2.00-10.
Mint, Peppermint, \$.20 each; \$1.50-10.
Rhubarb roots, extra strong, \$.25 each, \$2.00-10.
Sage, \$.20 each; \$1.50-10.
Tarragon, \$.25 each; \$2.00-10.

GLADIOLUS

	Price 10	100
Alice Tiplady, early rich orange saffron, the primulinus hybrid	\$1.00	\$7.00
America, soft flesh pink60	4.00
Baron Hulot, violet blue60	4.00
Empress of India, dark red.....	1.00	7.00
Halley, very early delicate salmon pink80	5.00
Le Marechal Foch, soft flesh pink, large flowers	1.25	10.00
Mrs. F. King, light scarlet60	4.00
Mrs. Watt, deep rich cherry red	1.00	7.00
Niagara, creamy white, splashed carmine80	5.00
Panama, rose pink80	5.00
Peace, white85	6.00
Prince of Wales, apricot pink, suffused salmon, early.....	1.00	7.00
Schwaben, yellow80	5.00
Wilbrink, a great favorite for cutting, delicate pink, very early	1.00	7.00
Gladiolus, assorted colors50	3.00
The above are all large bulbs, 1 inch up.		
Tuberroses, Double The Pearl, Double white fragrant flowers75	4.00
